

PRODUCT SPOTLIGHT

Innovations From Your Specialty Films Partner

Large Bulk Liners & FIBC

Overview

Winpak offers a number of films to meet the high-strength and various barrier requirements for bulk packaging, bin liners and Flexible Intermediate Bulk Containers (FIBC). With solutions ranging from poly films to sophisticated nine-layer coextrusions, packaged materials are protected from a range of contaminants such as dust, moisture, oxygen and/or chemicals. Large gusseted capabilities, specialty formulations and custom sizes position Winpak as a premier supplier for all bulk packaging needs.

Typical Applications

- Abrasives
- Adhesives
- Biohazard bags
- Bulk food transport
- Chemical collection and transport
- Coatings
- Compounds
- Drum or box liners
- Dust covers
- EPS liners
- Metal particles
- Pallet covers
- Pharmaceutical products
- Powdered products
- Resin liners

The Winpak Advantage

- ☑ Wide range of products from monolayer films to complex nine-layer coextrusions
- ☑ Nylon and EVOH barrier films
- ☑ Custom formulations, colors and sizes
- ☑ 30+ Years industry experience
- ☑ Large width capabilities
- ☑ Large gusseted capabilities
- ☑ Bags on roll
- ☑ Custom printing and bag making

Product Offering

Film Series	Product Description	Typical Applications
LF 1000	LLDPE blend	All purpose film for liners, bags and FIBC applications; gusseted or non-gusseted
LF 1300	High-slip metallocene blend	Designed for FIBC and liner applications requiring high physical and seal strength
LF 1500	Metallocene coextrusion	Designed for bulk liquid liners and FIBC applications requiring superior performance and flex-crack resistance
LF 2000	High-strength nylon coex with LLDPE sealant	Liner or FIBC applications requiring high strength
LF 5000	High-strength split nylon coex with a LLDPE sealant	Liner or FIBC applications requiring high strength
LF 7000	High-strength split nylon-EVOH coex with LLDPE sealant	Liner or FIBC applications requiring high chemical barrier
