COMPANY

Specialty Films

PACKAGING EXPERTS

Winpak offers sophisticated coextruded blown films in up to nine layers for specialty film applications and has become a leader in the flexible packaging industry by providing customers with innovative products, packaging expertise, and operational excellence. Partnering with customers, Winpak offers technical support and product development for new applications.

BARRIER FILMS

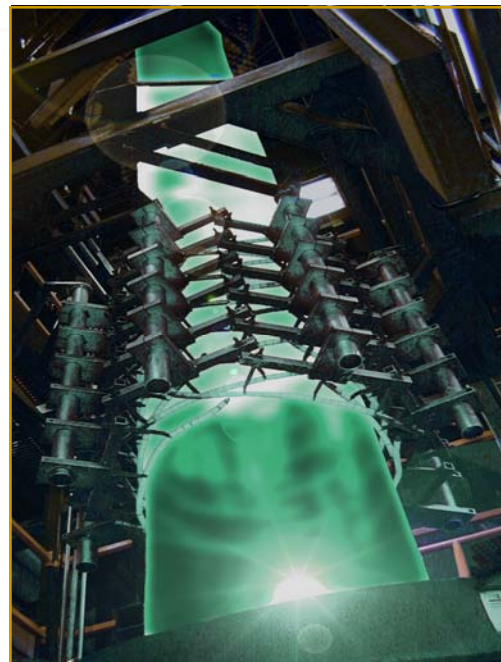

Winpak specializes in the manufacturing of sophisticated coextruded blown film structures for barrier and ultra barrier applications. Specialty films are constructed with a wide range of materials using some of the most advanced polymers the industry has to offer. Winpak also works closely with the leading thermoplastic resin producers to pioneer the development of new structures.

NON-BARRIER FILMS

Winpak offers a superior line of non-barrier films. Using a wide variety of polyolefins and copolymers, these films can range in complexity from a simple mono-film to a multi-layered coextruded film. Many non-barrier films are processed by converters who find them ideal for printing, laminating and bag making. Winpak also participates directly in a number of end-use markets where specialty polyethylene films are required.

BARRIER SHRINK BAGS

Winpak is proud to offer the DuraShrink™ barrier shrink bag for the preservation of meat and cheese products. DuraShrink™ provides balanced shrink performance in a durable, formfitting, and attractive package to preserve product freshness and maximize retail presentation.

Winpak manufactures coextruded blown film for specialty film applications.

WHAT CAN WINPAK OFFER YOU?

- ✓ Deliver your brand with vibrant 10-color flexographic printing
- ✓ Cost savings from state-of-the-art technology and total systems approach
- ✓ 30 years Industry Experience
- ✓ ISO 9001 Certified manufacturer (# 34946)
- ✓ Innovative and diversified product range
- ✓ On time delivery of consistent and high quality product

BARRIER AND NON-BARRIER FILM CAPABILITIES

Product	Min. Width	Max. Width	Typical Gauges: 1.0 mil to 8.0 mil +
Sheeting	8"	100"	Additional Offerings: EZ Open seals, Anti Static agents, Anti Fogging agents, slips and differential slips, and 10-color flexographic printing Minimum Order Sizes: 5,000 lbs.
Tubing	22"	100"	
Gussets	6"	48"	
Centerfold	12"	100"	
Bags	7"	78"	
Gusseted Bags (w/ 48" gussets)	24"	120"	

MARKETS

FOOD

Winpak offers sophisticated packaging films that can extend the shelf life of perishable foods while maintaining the quality of the product. State-of-the-art manufacturing capabilities, innovative products, and industry experience has made Winpak into a recognized leader in the food packaging industry. With such a wide range of solutions, Winpak can be the “one-stop shop” for customers flexible packaging needs. Applications include meat, cheese, poultry, fish and seafood, produce, dry goods, and frozen foods.

LIQUIDS AND PUMPABLES

Winpak offers a family of Vertical Form Fill and Seal (VFFS) films that are formulated to perform on most VFFS machines (e.g. Hayssen, Onpack, Triangle, Sandiacre, General, Tucs, and more). These films have a wide range of capabilities and applications which include: high moisture barrier liner films, Nylon skin films for fin seal applications, split Nylon films with or without oxygen barrier, and a variety of EVA, Metallocene, LLDPE, and Surlyn® skins for customers desiring a sealant film for a laminated product.

CONVERTER

Winpak offers a full line of barrier and nonbarrier films which are ideal converting applications such as surface printing, high speed laminating, and bag making. These converter films are available using the entire range of sealant resins (EVA, PP, Surlyn®, LDPE, LLDPE, mLLDPE, PB, and EZO or EZ Peel resins). Converters may utilize the technical advantage provided by these multilayer films to satisfy the needs of the most technically demanding end user.

MEDICAL

Winpak films are formulated for medical forming webs, pouches, bags and lidding, which are then gas, radiation, or heat sterilized. Products include sealant films for laminations, EZ peel lidding for medical presentations, draping films, and forming webs for HFFS applications that are ideal for medical device packaging. Winpak is experienced and knowledgeable in the compatibility of raw materials and sterilization methods.

INDUSTRIAL AND SPECIALTY FILMS

Winpak offers a number of industrial and specialty films. These films are designed to meet the high strength and varying barrier requirements for the Intermediate Bulk Container (IBC) market. Applications include bulk food transport, biohazard bags, asbestos containment, resin liners, mold remediation, chemical collection and transport, and EPS liners. Winpak also serves the automotive industry with sealing films for carpet and dashboard masking, auto masking, and headliner applications.
