

*December 1999*

## **AN ISO 9001 CERTIFIED COMPANY**

In December 1999, Winpak's specialty films facility in Senoia, Georgia joined other Winpak facilities by being awarded the Certificate of Registration by ABS Registrars. ISO 9001 is a standardized Quality System made up of twenty elements, which define how we manufacture and deliver products to our customers in accordance with company policies and procedures. ISO systems have been the backbone of international companies for many years and are rapidly gaining acceptance in the United States. The receipt of Winpak's certification is but another example of our commitment to becoming an internationally recognized film company in the new millennium!
