WINPAK ANNOUNCES NEW PRODUCT

***Thermoformed, Plastic, Polypropylene Barrier 4.0 oz. Container
(Ideal for Applesauce):***

Winpak, the leader in thermoformed portion control packaging, has added in-line co-extrusion and thermoforming of barrier polypropylene and polypropylene materials. Our newest 4.0 ounce container is ideal for Applesauce. The cup is manufactured from clarified polypropylene barrier material. It is an extension to our 75 millimeter (cup top out diameter) Big Dipper™ product line and complements our total offering with its sleek, stylized design. This single serve container offers the food industry a high quality package with superior barrier properties providing extended shelf-life for the packaged product.

The introduction of the 4.0 oz cup allows Winpak to offer a complete turn-key system to applesauce producers. Winpak is the only supplier in the applesauce market offering a custom lid designed specifically for applesauce. The die-cut foil lid is superior providing excellent tear resistance. The Vari-Fill™ Filling Machine is brilliantly engineered providing high-speed filling capabilities of up to 300 packages per minute.

Winpak specializes in supplying portion control packaging systems to the food, dairy and portion control industries for over 30 years. Winpak's total system approach of supplying economical high quality packaging materials, efficient high-speed filling machines, sales and technical support has enabled us to be a leader in supplying these markets.

Winpak is THE choice for total packaging solutions.
