WINPAK INTRODUCES THE MARK II

Winpak is proud to unveil the very latest in vertical form fill and seal packaging machinery. At the recent Pack Expo International, Winpak introduced the [Mark II](#). The servo-controlled machine provides a package with more precision control at faster speeds, easily outperforming any current competitive offering in this market. The Mark II can be networked to provide 24/7 technical support from Winpak engineers allowing remote diagnostics and trouble shooting through the internet.
