1. General

Winpak Ltd. is incorporated under the Canada Business Corporations Act. The Company manufactures and distributes high-quality packaging materials and related packaging machines. The Company's products are used primarily for the packaging of perishable foods, beverages and in health-care applications. The address of the Company's registered office is 100 Saulteaux Crescent, Winnipeg, Manitoba, Canada R3J 3T3.

2. Basis of Presentation

The unaudited interim condensed consolidated financial statements were prepared in accordance with International Financial Reporting Standards (IFRS), using the same accounting policies as those used in the Company's consolidated financial statements for the year ended December 29, 2013, except as disclosed in note 3. The unaudited interim condensed consolidated financial statements are in compliance with IAS 34. Accordingly, certain information and note disclosure normally included in annual financial statements prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB) have been omitted or condensed. These unaudited interim condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended December 29, 2013, which are included in the Company's 2013 Annual Report.

The fiscal year of the Company ends on the last Sunday of the calendar year. As a result, the Company's fiscal year is usually 52 weeks in duration, but includes a 53rd week every five to six years. The 2014 and 2013 fiscal years are both comprised of 52 weeks and each quarter of 2014 and 2013 are comprised of 13 weeks.

The unaudited interim condensed consolidated financial statements were approved by the Audit Committee on behalf of the Board of Directors on April 24, 2014.

3. Accounting Standards Implemented in 2014

(a) Financial Instruments - Presentation:

The amendments to IAS 32 "Financial Instruments: Presentation" clarify some of the requirements for offsetting financial assets and financial liabilities on the statement of financial position. The amendments do not change the current offsetting model in IAS 32 but instead clarify that the right of offset must not be contingent on a future event. It also must be legally enforceable for all counterparties in the normal course of business, as well as in the event of default, insolvency or bankruptcy. The amendments also clarify that gross settlement mechanisms with features that both (i) eliminate credit and liquidity risk and (ii) process receivables and payables in a single settlement process, are effectively equivalent to net settlement. These amendments were implemented in the first quarter of 2014 with retrospective application and had no impact on the Company's unaudited interim condensed consolidated financial statements.

(b) Levies:

A levy is an outflow of resources embodying economic benefits that is imposed by governments on entities in accordance with legislation, other than income taxes and fines and other penalties imposed for breaches of the legislation. IFRIC 21 "Levies" clarifies that an entity recognizes a liability for a levy when the activity that triggers payment occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the minimum threshold is reached. The interpretation was implemented in the first quarter of 2014 with retrospective application and had no impact on the Company's unaudited interim condensed consolidated financial statements.

4. Future Accounting Standards

(a) Financial Instruments:

IFRS 9 "Financial Instruments" was issued in November 2009, introducing new requirements for the classification and measurement of financial assets. IFRS 9 was amended in October 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition. IFRS 9, which has yet to be adopted, retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity's business model and the contractual cash flow of the financial asset. Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument. With regard to the measurement of financial liabilities designated as fair value through profit or loss, IFRS 9 requires that the amount of the change in the fair value of the financial liability, that is attributable to changes in the credit risk of that liability, is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in the statement of income. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to the statement of income. Previously, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss was presented in the statement of income. In November 2013, a new general hedge accounting standard was issued, forming part of IFRS 9. It will more closely align with risk management. This new standard does not fundamentally change the types of hedging relationships or the requirement to measure and recognize ineffectiveness, however it will provide more hedging strategies that are used for risk management to qualify for hedge accounting and introduce more judgment to assess the effectiveness of a hedging relationship. The effective date for IFRS 9 has not yet been determined. The Company is currently assessing the impact of this new standard and does not intend to early adopt IFRS 9 in its consolidated financial statements for the annual period beginning on December 29, 2014.

For the periods ended March 30, 2014 and March 31, 2013 (thousands of US dollars, unless otherwise indicated) (Unaudited)

5. Inventories

	March 30 2014	December 29 2013
Raw materials	27,047	27,125

At March 30, 2014			
Current liabilities	427	-	427
Non-current liabilities	5,758	787	6,545
	6,185	787	6,972

The Company participated in one multiemployer defined benefit pension plan providing benefits to certain unionized employees in the US. The Company withdrew from the plan in 2011. There has been no new developments regarding the withdrawal liability in the current year. Refer to the 2013 Annual Report for additional information. A one-percentage point increase in the discount rates would have decreased the March 30, 2014 liability by \$461 and increased income before income taxes by \$461.

7. Other Expenses

	Quarter	Ended
	March 30	March 31
Amounts shown on a net basis	2014	2013
Foreign exchange loss Cash flow hedge (losses) gains transferred from other	(551)	(326)
comprehensive income	(682)	21
Multiemployer defined benefit pension plan withdrawal liability (expense) income	(83)	79
	(1,316)	(226)

8. Income Tax Expense

Excluding adjustments to the income tax provision for prior periods, the weighted average of the annual income tax rates used for the quarter ended March 30, 2014 was 32.3 percent (2013 - 31.1 percent).

For the periods ended March 30, 2014 and March 31, 2013 (thousands of US dollars, unless otherwise indicated) (Unaudited)

9. Property, Plant and Equipment and Intangible Assets

At March 30, 2014, the Company has commitments to purchase property, plant and equipment of \$11,435 (2013 - \$13,385). No impairment losses or impairment reversals were recognized in the first quarter of 2014 or 2013.

10. Dividends

During the first quarter of 2014, dividends in Canadian dollars of 3 cents per common share were declared (2013 - 3 cents). In addition, the Company paid a special dividend in Canadian dollars of one dollar per common share on March 20, 2014.

11. Earnings Per Share

	Quarter	Ended
	March 30	
	2014	2013
Net income attributable to equity holders of the Company	16,163	15,989
Weighted average shares outstanding (000's)	65,000	65,000
Basic and diluted earnings per share - cents	25	25

12. Determination of Fair Values

The Company measures assets and liabilities under the following fair value hierarchy in accordance with IFRS. The different levels have been defined as follows:

- Level 1 unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 inputs that are not based on observable market data.

The fair value of cash and cash equivalents, trade and other receivables, trade payables and other liabilities approximate their carrying value because of the short-term maturity of these instruments. The fair value of foreign currency forward contracts, designated as cash flow hedges, have been determined by valuing those contracts to market against prevailing forward foreign exchange rates as at the reporting date.

The following table presents assets and liabilities within the fair value hierarchy as at March 30, 2014:

Assets (Liabilities)	Level 1	Level 2	Level 3	Total
Foreign currency forward contracts - net	-	(1,109)		(1,109)

13. Financial Instruments

When the Company has a legally enforceable right to set off supplier rebates receivable against supplier trade payables and intends to settle the amount on a net basis or simultaneously, the balance is presented as an offset within Trade Payables and Other Liabilities on the condensed consolidated balance sheet. At March 30, 2014, the supplier rebate receivable balance that was offset was \$2,605 (December 29, 2013 - \$3,575).

14. Financial Risk Management

In the normal course of business, the Company has risk exposures consisting primarily of foreign exchange risk, interest rate risk, commodity price risk, liquidity risk, and credit risk. The Company manages its risks and risk exposures through a combination of derivative financial instruments, insurance, a system of internal and disclosure controls and sound business practices. The Company does not purchase any derivative financial instruments for speculative purposes.

Financial risk management is primarily the responsibility of the Company's corporate finance function. Significant risks are regularly monitored and actions are taken, when appropriate, according to the Company's approved policies, established for that purpose. In addition, as required, these risks are reviewed with the Company's Board of Directors.

For the periods ended March 30, 2014 and March 31, 2013 (thousands of US dollars, unless otherwise indicated) (Unaudited)

Foreign Exchange Risk

Translation differences arise when foreign currency monetary assets and liabilities are translated at foreign exchange rates that change over time. These foreign exchange gains and losses are recorded in other expenses. As a result of the Company's CDN dollar net asset monetary position as at March 30, 2014, a one-cent change in the period-end foreign exchange rate from 0.9042 to 0.8942 (CDN to US dollars) would have decreased net income by \$42 for the first quarter of 2014. Conversely, a one-cent change in the period-end foreign exchange rate from 0.9042 to 0.9142 (CDN to US dollars) would have increased net income by \$42 for the first quarter of 2014.

The Company's Foreign Exchange Policy requires that between 50 and 80 percent of the Company's net requirement of CDN dollars for the ensuing 9 to 15 months will be hedged at all times with a combination of cash and cash equivalents and forward or zero-cost option foreign currency contracts. The Company may also enter into forward foreign currency contracts when equipment purchases will be settled in other foreign currencies. Transactions are only conducted with certain approved Schedule I Canadian financial institutions. All foreign currency contracts are designated as cash flow hedges. Certain foreign currency contracts matured during the first quarter of 2014 and the Company realized pre-tax foreign exchange losses of \$682 which were recorded in other expenses. During the first quarter of 2013, the Company realized pre-tax foreign exchange gains of \$54. Of these foreign exchange differences, gains of \$21 were recorded in other expenses and gains of \$33 were recorded in property, plant and equipment.

As at March 30, 2014, the Company had US to CDN dollar foreign currency forward contracts outstanding with a notional amount of US \$28.0 million at an average exchange rate of 1.0653 maturing between April 2014 and February 2015. The fair value of these financial instruments was negative \$1,109 US and the corresponding unrealized loss has been recorded in other comprehensive income.

Interest Rate Risk

The Company's interest rate risk arises from interest rate fluctuations on the finance income that it earns on its cash invested in money market accounts and short-term deposits. The Company developed and implemented an investment policy, which was approved by the Company's Board of Directors, with the primary objective to preserve capital, minimize risk and provide liquidity. Regarding the March 30, 2014 cash and cash equivalents balance of \$112.8 million, a 1.0 percent increase/decrease in interest rate fluctuations would increase/decrease income before income taxes by \$1,128 annually.

Commodity Price Risk

The Company's manufacturing costs are affected by the price of raw materials, namely petroleum-based and natural gas-based plastic resins and aluminum. In order to manage its risk, the Company has entered into selling price-indexing programs with certain customers. Changes in raw material prices for these customers are reflected in selling price adjustments but there is a slight time lag. For the quarter ended March 30, 2014, 70 percent of revenue was generated from customers with selling price-indexing programs. For all other customers, the Company's preferred practice is to match raw material cost changes with selling price adjustments, albeit with a slight time lag. This matching is not always possible, as customers react to selling price pressures related to raw material cost fluctuations according to conditions pertaining to their markets.

Liquidity Risk

Liquidity risk is the risk that the Company would not be able to meet its financial obligations as they come due. Management believes that the liquidity risk is low due to the strong financial condition of the Company. This risk assessment is based on the following: (a) cash and cash equivalents amounts of \$112.8 million, (b) no outstanding bank loans, (c) unused credit facilities comprised of unsecured operating lines of \$38 million, (d) the ability to obtain term-loan financing to fund an acquisition, if needed, (e) an informal investment grade credit rating, and (f) the Company's ability to generate positive cash flows from ongoing operations. Management believes that the Company's cash flows are more than sufficient to cover its operating costs, working capital requirements, capital expenditures and dividend payments in 2014. The Company's trade payables and other liabilities and derivative financial instrument liabilities are virtually all due within twelve months.

Credit Risk

The Company is exposed to credit risk from its cash and cash equivalents held with banks and financial institutions, derivative financial instruments (foreign currency forward contracts), as well as credit exposure to customers, including outstanding trade and other receivable balances.

The following table details the maximum exposure to the Company's counterparty credit risk which represents the carrying value of the financial asset:

	March 30	December 29
	2014	2013
Cash and cash equivalents	112,836	161,090
Trade and other receivables	102,761	98,408
	215,597	259,498

For the periods ended March 30, 2014 and March 31, 2013 (thousands of US dollars, unless otherwise indicated) (Unaudited)

Credit risk on cash and cash equivalents and other financial instruments arises in the event of non-performance by the counterparties when the Company is entitled to receive payment from the counterparty who fails to perform. The Company has established an investment policy to manage its cash. The policy requires that the Company manage its risk by investing its excess cash on hand on a short-term basis, up to a maximum of six months, with several financial institutions and/or governmental bodies that must be 'AA' rated or higher by a recognized international credit rating agency or insured 100 percent by the US government or a 'AAA' rated CDN federal or provincial government. The Company manages its counterparty risk on its financial instruments by only dealing with CDN Schedule I financial institutions.

In the normal course of business, the Company is exposed to credit risk on its trade and other receivables from customers. The Company's current credit exposure is higher in the weakened North American economic environment. To mitigate such risk, the Company performs ongoing customer credit evaluations and assesses their credit quality by taking into account their financial position, past experience and other pertinent factors. Management regularly monitors customer credit limits, performs credit reviews and, in certain cases insures trade and other receivables against credit losses.

As at March 30, 2014, the Company believes that the credit risk for trade and other receivables is mitigated due to the following: a) a broad customer base which is dispersed across varying market sectors and geographic locations, b) 98 percent of gross trade and other receivable balances are outstanding for less than 60 days, and c) 20 percent of the trade and other receivables balance are insured against credit losses. The Company's exposure to the ten largest customer balances, on aggregate, accounted for 41 percent of the total trade and other receivables balance.

The carrying amount of trade and other receivables is reduced through the use of an allowance account and the amount of the loss is recognized in the statement of income within general and administrative expenses. When a receivable balance is considered uncollectible, it is written off against the allowance for doubtful accounts. Subsequent recoveries of amounts previously written off are credited against general and administrative expenses in the statement of income.

The following table sets out the aging details of the Company's trade and other receivables balances outstanding based on the status of the receivable in relation to when the receivable was due and payable and related allowance for doubtful accounts:

	March 30	December 29
	2014	2013
Current - neither impaired nor past due	85,993	78,113
Not impaired but past the due date:		
Within 30 days	16,178	19,399
31 - 60 days	1,413	1,931
Over 60 days	417	162
	104,001	99,605
Less: Allowance for doubtful accounts	(1,240)	(1,197)
Total trade and other receivables, net	102,761	98,408

15. Segment Reporting

The Company operates in one reportable segment being the manufacture and sale of packaging materials. The Company operates principally in Canada and the United States. The following summary presents key information by geographic segment:

	United States	Canada	Other	Consolidated
For The Quarter Ended March 30, 2014	450.000	24.422		400.000
Revenue	152,239	24,183	11,655	188,077
Property, plant and equipment and intangible assets	151,510	196,456	1,384	349,350
For The Quarter Ended March 31, 2013				
Revenue	136,677	23,202	10,070	169,949
Property, plant and equipment and intangible assets	144,477	178,789	1,474	324,740

16. Seasonality

The Company experiences seasonal variation in revenue, with revenue typically being the highest in the second and fourth quarters, and lowest in the first quarter.
